F1 in Schools
27 November 2009

PLANNING FOR 2010 AND 2011

It is envisaged to have a planning session for the activities for F1 in Schools for the 2010/11 season.

In the past the time line was set at the beginning of the year, with the only target date the World Championships. The latter mentioned happened in the same calendar year as the nationals. This has changed with the World Championships for 2008/9 season only taking place in September 2009.

It is envisaged also that the regional and provincial competitions take place in the first half of 2010 and the national championships be held early in the second half of 2010. This will give teams the opportunity to prepare for the championships during the winter holidays.

One of the issues involved with the planning of events is the fact that government schools and independent schools have different school term dates. To accommodate everybody it is needed to get the input and commitment from as many role players as possible. Once general agreement is reached on the time line dates can be fixed and communicated to all concerned early in the year.

It is suggested that a one day workshop be held at Sci-Bono Discovery Centre in Newtown, Johannesburg on **16 January 2010**. This will also give the educators that attended the World Championships, in London in September 2009, the opportunity to share their experiences with the delegates. Representatives from the Manufacturing, Racing and testing centres will also be invited and they can share valuable information with the educators, specifically on manufacturing requirements and suggestions to make the process run smoother.
